Volume 17. THE REDCLIFF REVIEW, THURSDAY, OCT. 4th, 1928 Number 32

Dr. Kerby's Lecture Was a Masterpiece

Anniversary Supper and Concert A Great Success.

From a local local news point, this appears to have been Gordon Memorial's week for providing the Review with material abut which to wrte. We regret that spase will nt permit us to write even more than we have, as the extraordinary slccess of all the events in connection with the anniversary celebration, warrants it.

The anniversary supper and entertainment held on Mnnday evening under the auspices of the Ladies' Aid was, once more, a great success despite the precautions being taken to control the epidemic in town. The supper was well attended, and from the standpoit of eats, was pronounced the best yet. After the supper there was a musical prigram and a lecture by Dr. Kerby on "Canada and Canadians." As in mst of their entertainmets the Aid intrtduced stme new talent to a Redcliff audience. On this occasion it was Mrs. Harry Matthews, of Medicine Hat who delighted the audience with her sweet soprano voice; and Mr. Dufferin, a new arrival from Scotland who captivated the crowd with his masterly performance on the violin. Jack and Jean Ellis, of Medicine Hat, are are always welcome contributors to a program here, but never before did they so catch the audience as on this occasion. The junir choir paved the way for a splendid program by opening with a patriotic chorus, sung as these boys and girls always sing—most delightfully.

Rev. Magowan of Medicine Hat brought greetings from the ministerial association of the district. He wished the congregation success and expressed deep regret at the removal of Mr. and Mrs. Matteson from the district.

. Dr. Kerby's lecture was a masterpiece and when he had finished one felt like thanking heaven one lived in in Canada under the British flag. In a most interesting and educative way Dr. Kerby traced Ca nada's growth from a humble beginning of obscurity to her present position, in which she finds herself on the road to everywhere and with theu eyes of the whole world turned towards her. It had been said that Canada was just beginning to scratch the fringe of her potential wealth it was the speakers pinion thaat, even in the midst of her present greatness, she was just beginning to itch. The three outstanding periods in Canadian history were referred to. The first was the Reil rebellion when east came west and there was born a Dominion consciousness of one Canada. In 1900 the South African war in which Canada took part, gave bith to the Dominin's national consciousness, and in 1914 Canada flung her forces into the conflict against world andacity and there was brn i the Dominion a world conscionsness. So that today Canadians are citizens of the Dominion, of the Empire and of the world.

Both the French and English races here had contributed much to the development o Canada in Education, religion, adventure, literature, agriculture science and government until today their record is one of magnificent achevement.

. Canada's needs today were summed up as: appreciation of past achevements; the cultivation of a real Canadian ideal, taught in our schools, to produce a sane and sound Canadianism; a new interest in, and atmospherefor, strangers who are coming to our shores and contributing much tt our national life; individual responsibility in the task of obliterating the clevage between east and west, capital and labor, urban and rural districts and between religeous sects. Canada is today leading the world along many lines,

Vega Celebrates 77th Anniversary

Have Enjoyable Social Evening On Sept. 26

(Contributed)

A very pleasant evening was spent n Wednesday, Sept. 26th, by the sisters and brothers of Vega Ldge and friends, to commemorate the 77th anniversary of the institution of the order.

Cards were played for a short time and on the arrivalof the orchestra veryone settled dowr for a pleasant evening of enjoyment. A banquet lunch was served at 11 o'clock by the social cmmittee, who, as usual, catered to the wants f all. After lunch the party again crowded the dance floor until the playing of the "Home Sweet Home" waltz, which is the end cf all pleasant evenings.

Redcliff people were delighted to see a poem in the Calgary Herald last Thursday, written by Miss Eayth Broadfoot of this town. Miss Broadfoot has also made seevral contributins to other papers and magazines. We cngratulate Miss Broadfoot on the excellent quality of her poems.

* * *

The longest and heaviest train load of grain in the world's histry was carried this week by the C. P. R. The train consisted of 135 loaded grain cars a water car and an engine. The gross weight of the train was 8,725 tons with a total of 202,000 bushels, the prduce from over 10,000 acres at 20 bushels to the acre.

said the speaker, and it was his closing wish that she lead along the line of christian brotherhood

During the evening the congregation presented Mr. and Mrs. Matheson with a purse, on the eve ff their departure. The Bowell congregation also made a simlar presentation.

Rev. Mathesou Family Leves For kimberley

Left By Motor Last Tuesday for Kimberly, B. C.

Rev. and Mrs. Matheson and family left last Tuesday morning for their new home in Kimberly B. C. They went by mtoro.

Mr. Matheson has been pastor of Gordon Memorial church here for the past four years and during that time his thoughtfulness kindness and willingness to help thers, have won for him many staunch friends who will be keenly interested in following his career in his chsen field of work. Mrs. Matheson will also be greatly missed among those in all branches of the church work in which she tok an interest and in which she was such a help. Her reputation as a poet has won distinctin for her throughont the west. The family wil also be missed in the school and in all young people's circles.

The Review joins in wishing them all success in their new home. Mr. Matheson accepted a call to the United Church at Kimberly.

ALDERSON PRAIRIE FIRE

A disastrious prairie fire occurred in the Alderson district last Saturday afternon, when an area estimated at more than one hundred thousand acres was burned over. Some buildings some buildings and stock were destroyed, while the town of Aldedson and district fought fire all Saturday afternoon and night, east, west and suth of the town. The residents were assisted by C. P. R. men from Brooks and Medicine Hat, who gave evry valuable assistance southwest of town. The Nine-Bar ranch was one of the heaviest losers, but saved their buildings. The cause of the fre is unknwn.

School Remains Closed Next Week

As Precautionery Measure To Control Diptheria

Last week end a number of casee of diphtheria were reported the medical health officer in town. As a precautionery measure Dr. Rogers closed the Sunday schools on Sunday and day school has been closed all week. Since the outbreake a few new cases have developed and as the incubation period has not yet elapsed it has been deciled to keep the school closed all next week.

Dr. Rogers' office was a busp place last Sunday, as dozens of children were up getting inoculated. Of the caese recently developed none have been among children who have been inocutated.

So far there is not much need to become alarmed but parents shoud watch their children closely and report the first symptoms to the doctor.

LIT HOLDS FAREWELL PARTY FOR PUPILS

Lastl Friday the high schoo Lit held a farewell party fr Helen and Hugh Matheson who were leaving with their parents for Kimberly, B. . Durng the evening refreshments were served, after which Mr. Russel and Fracis Buchholz, o behalf of the Lit, expresed regret over the removal of these popular students. They also wished them success in their new home. In an interesting maner Hugh replied. He thanked the principal and the students for the kind remarks and said he and his sister would always remember the happy days spent in Redsliff.

The Pressed Brick plant opened up for business last Monday after being closed down for two weeks for repairs made necessary by an accident at the plant.

Football Dance Was A Great Success

Good Crwd in Attendance And Ejoyable Time

Cliff Hall was well filled last Friday evening fo the whist drive and dance given by the local football club. Keen competition was shown in the drive. When the tallies were counted up it was found that Mrs. Podesta, sr. had won the ladies' first prize and T. Davies the gent's. Miss Bardell won the ladies' second and N. Willis the gent's. later was a tie between N. Willis and R. Schmidt but Willis won on a cut. Miss Towle and Mr. Slater, bth of Medicine Hat won the ladies' and gent's consolations. For the dance, prizes were also offered for some novel events. Miss Bardell won the prize fr the best lady waltzer and W. Willis for the best gent waltzer. The spot dance prize was won by Mrs. Phillips and the second prize by Miss Dacre.

The prizes for the different events were donated by the Canadian Legion, C. T. Hall, F. Odlin, Mrs. Hicks, G. N. Pearson, Mrs. Kerr, Club Cafe and A. E. Smith. The event throughout was a great success both from the point of attendance and a good time.

Churches

ST. AMBROSE CHURCH

Women's Missionary Society on the last Thursday of each month at 3 p.m.

Ladies' Aid, every Thursday, 3 p.m.

Mission Band every second Monday at 4:15 p.m.

Services will be held as usual morning and evening. Rev. Smith, the new pastor wil conduct the services.

CHURCH OF THE BRETHREN

Rev. D. Hollinger, Minister

Usual services.

ST. MARY'S CHURCH

Celebration of Mass. Second and Fourth Sundays of each month at at 8:30 a m

Dr. Kerby Speaker at Anniversary Services

Gives Two Splendid Sermons at Grdon Memorial

Annievrsary services were held in Gordon Memorial church last Sunday morning and evening. Rev. Dr. Kerby of Calgary was the speaker for the occasion and he preached two eloquent, impressive and apprpriate sermons. In the morning he took for his text a phrase frm the 3rd verse of Mark 14: "There Came a woman." His subject was Service which he dealt with under the headings of timely service, extraordinary service, enthusiastic service and imperishable service. Referring to the timeliness of the service rendered to the Master by the woman in the chapter the speaker said that now is the time to say the kind word of appreciation or render service to those around about us Instead of amassing a fortune to leave to our friends, we shuld be our own executors and use our money, talents, influence and opportunities fr the betterment of conditions in the community. Wholesome surroundings are the best things we can leave to our children. "A ton of coal is better that a basket of flowers," said the speaker.

"Extraordinary service brings extra results he continued. The woman mentioned in the chapter rendered extraordinary service. She forgot custom and, regardless of what the crowd would say or think, she stepped out of the rut and rendered a service which brought praise and appreciation from Christ. Her service was impulsive and enthusiastic and, as a result was imperishable. These qualities of service were impressively applied [illegible] and attention was drawn to the many opportunities for their application.

In the evening he laid stress on the need of all having some objective in lifeand then entering into the bringing about of that objective, with enthusiasm. The main thing, he said, was to have some worth while objective Some of the greatest tragedies in life were the result of energies used in the wrong direction. Some people think they never go wrongbut it is because they never go at all and they find fault with thse who enter into some line of activity with enthusiasm. The speaker admonished his hearers to capitalize their enthusiasm; capitalize it in the home, in the church, in the school and in the community. Their objective should be to maak the community in which they live the best spot in the wold. Regenerate the human spirit, but in all our activities we shuld keep in tune with the Infinite.

Special music was rendered both morning and evening by the junior and senior choirs and the church was nicely decorated with flowers fr the occasion.

Here and There

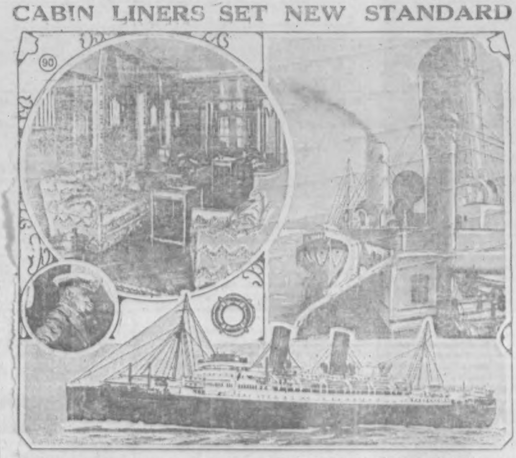
(79)

The Rocky Mountain Lakes fishing season was opened recently with a catch of a thirty-two pound lake trout by George Andrews of Banff, in Lake Minnewanka. A number of others of not such a great weight were caught by guests of the Banff Springs Hotel.

The month of April was the most successful so far this year from the standpoint of families settled, according to a statement issued by the Canada Colonization Association. During the month 81 families were settled throughout the Dominion on 19,249 acres of land, bringing the total of settlements from the first of the year up to 224 on 46,207 acres.

There are in Alberta today 77,192 farmers who have 834,324 horses in use and 10,225 tractors. In Saskatchewan records show 116,762 farmers with 1,199,566 horses and 24,367 tractors. Manitoba has 51,200 farmers with 350,480 horses and 10,833 tractors. The survey would indicate that while the horse is yet far from being a back number on Western Canadian farms, the day of the tractor has definitely arrived.

CABIN LINERS SET NEW STANDARD



Upper right—A general view of the vessel looking aft. Upper left—An interior view showing the cabin smoking room with its luxurious decorations. Lower—"The Duchess of Bedford" as she appeared when coming up the St. Lawrence River. Inset—Capt. H. Sibbons, commander of the "Duchess of Bedford."

POOF that the St. Lawrence route is rapidly inreasing in popularity and that an era of continued prosperity is predicted for her ports, is shown by the addition of four new cabin class liners of the new "Duchess" type to the Atlantic fleet of the Canadian Pacific.

The Duchess of Bedford, leader of this quartette of the largest liners to Montreal, arrived in that port at 8 p.m. June 8th, having completed her maiden voyage in exactly seven days after leaving Liverpool. The liner is over 20,000 tons gross register, is oil burning, two-funnelled, and measures 600 feet in length and 75 feet in width. She will carry Cabin Class, Tourist Third Cabin, and Third Class passengers. In each class broad deck space is available, and accommodation is far superior to more expensive quarters on Atlantic liners of not long ago. The three sister ships of the Duchess of Bedford, now under construction in the shipbuilding yards of the Clyde, are the Duchess of Atholl, Duchess of Cornwall, and Duchess of Richmond.

The discoveries of radio engineers have aided in making the Duchess of Bedford an outstanding marine Penality. For instance, while the ship's orchestra is playing in the Cabin Dining Room the music is relayed by means of microphones and amplifiers to the Tourist Third Cabin and Third Class Lounges and decks. Loud-speakers also simplify the transmission of orders to the forecastle, crow's nest, and docking-bridge.

Other interesting facts about the construction of the Duchess of Bedford are that the twin propellers weigh 16½ tons each, and the 183 foot steel shafts connecting them with the powerful turbine engines weigh about 108 tons. Nearly two million rivets were used in the ship, totalling 1,000 tons in themselves, some of the plates having as many as 650 rivets each.

The advent of the "Duchesses" greatly increases the passenger and freight services maintained by the Canadian Pacific on the St. Lawrence route. The schedule of passenger sailings had already been increased this summer by speeding the "turn about" of the Empresses from a four-weekly basis to meet the expected expansion of traffic. The "Beaver" class of ships, newcomers to the St. Lawrence also, have been placed by the Canadian Pacific on an exclusively freight service. They run regularly between Montreal and London and continental ports, making almost as good time as the passenger liners.

"Safety First" on the Highways

The phenomenal growth in the number of motor driven vehicles on the highways of this continent constitutes one of the most amazing developments of modern times. The motor car has, in fact, completely revolutionized modes of living in the space of a very few years, and, equally so, has ushered in an entirely new era in the history of transportation.

It is not necessary to even enumerate the many changes which the general use of the motor car has brought about. These changes are patent to everyone. The result has been, of course, to likewise create entirely new problems which did not confront, and were never dreamed of, by the people of a couple of generations ago.

The motor car has forced governments and municipalities to completely re-organize plans and the work of road building because what was regarded as an excellent road for horse drawn buggies and wagons is quite obsolete in these days of motor traffic. The result has been to compel huge expenditures upon all governmental authorities, not only in the construction of a much higher standard of road, but in annual maintenance charges in order that such roads shall be kept up to that high standard, and shall be available for use at all times in all weathers.

In large cities, the multiplicity of cars has created congestion and traffic problems of the most difficult kind, and the number, power and speed of modern cars not only an hourly danger to each other and their occupants but to all pedestrians. Laws governing rates of speed, laws prohibitive of glaring headlights for night driving, and innumerable rules of the road in an effort to regulate this enormous and ever increasing traffic, have been passed. Many of these enactments were experimental and found ineffective. Amendments to laws have followed amendments in rapid succession, yet the toll of accidents and violent death mounts steadily higher and higher.

The fact might as well be faced,—it must be faced,—that only through the practice of the principle of "Safety First" by the people themselves,—all the people,—can the civilization of today really control this modern juggernaut which the inventive genius of this generation has brought into being and to such a high state of power and efficiency.

Legislative enactments, and arrests and fines for violation of those laws, will not, and can not meet the existing problems. Public sentiment and the public conscience must be aroused against those who habitually and wilfully disregard the laws and regulations passed in the interests of all people. The speed maniac, the man who persists in flashing blinding headlights in the eyes of all other car drivers, the crank who considers it an insult and a reflection upon himself and his car to allow any other car to pass him on the road, the crazy fool who not only disregards all safety precautions for himself but who is callously indifferent to the fate of others, and the common "roadhog" who ignores everybody's rights and selfishly arrogates whatever he desires to himself,—all these enemies to the welfare, enjoyment, rights, and even lives of others, must become taboo throughout the land and be ostracised by his fellow citizens in the community.

Every driver of a car should keep constantly in mind that it is a powerful machine he has in his control, and that the safe way is the sane way. Common sense will prevent accidents. Apply it. There is not only the law but an etiquette of the road. Observe it. Protect person and property—your own and the other fellow's.

Two controllable factors enter into accident prevention on the streets and highways,—your car; yourself. Always observe, among others, the following simple rules for safety:

1. Keep your car right; see that the brakes, steering gear and headlights are in perfect working order.
2. Keep your eye on the road and your hands on the wheel.
3. In passing traffic, look ahead.
4. If a "road-hog" tries to pass you—let him.
5. Entering main streets and highways—stop and listen.
6. Don't rush through nor "loaf" in heavy traffic.
7. Signal before you slow down, stop, or change your course.
8. Look before you back up.
9. Obey the "Stop" signal.
10. Watch your "Step"—Don't "step" on the gas, the train will win.

Continues Best Seller

Over Ten Million Copies Of Bible Sold Last Year

The Bible continued to be the world's best selling book in 1927, establishing a new record of 10,034,797 copies ,says the annual report of the American Bible Society.

Copies were published last year in 166 different languages and dialects, and the first complete Bible in the Luba Lulua language of the 2,500,000 Bantu natives of the Belgian Congo was issued by the Society.

There are 150 convicts serving life terms in prisons of Canada.

GOOD ADVICE FROM MOTHER OF SEVEN

Recommends Lydia E. Pinkham's Vegetable Compound

Toronto, Ont.—"I began taking Vegetable Compound for nerves and other troubles and I must say I felt different after the first dose. I have been told this last six months that I look twenty-five, although I am now forty-seven and have had seven children. I have taken the Vegetable Compound regularly for some time and sleep well, rise early and feel young."—MRS. MCKEE, 18 Laurier Ave., Toronto, Ontario.

Norse Celebration In Winnipeg

Great Interest Being Taken In Re-Union To Be Held Shortly

Of its kind, the Norse celebration to be held in Winnipeg this year, is expected to be the largest gathering of the summer. Their kith and kin to the number of twenty-five thousand from the central western States will come, and an equal number from western Canada.

Men prominent in Norse circles; descendants of pioneers on both sides of the International line, are displaying a very active interest in the reunion. Among the prominent speakers will be: Governors Christianson, of Minnesota, and Sorlie, of North Dakota. Far off Norway is sending a delegation to participate in the Norwegian Sangerfest, and official delegates from that country will comprise representatives of the government, church and various civic bodies. The week of July 5-11 will mark the occasion for the festival. In connection with this festival will be the annual convention of the Norwegian Danish Press, of America. This will bring to Winnipeg some fifty newspaper and magazine editors, prominent in the association.

"Hi, there," bellowed a policeman to an inebriated citizen, "you can't stand there in the street."

"Yes, I can orfsher" retorted the citizen proudly. "Don't you worry 'bout me. I been standin' here an hour an' ain' fell off yet."

Young Bride: "I want a piece of meat without any gristle, bone or fat."

Butcher: "Lady, you don't want any meat—you want an egg!"

SEA STRAIGHTENS ROMANTIC TANGLES

When May Christie, whose novels and articles are read all over the North American Continent, reaches an impasse with characters in her novels, she "sends them on an Atlantic voyage," to use her own words, because their tangles are unravelled on the ocean. Miss Christie, now married to J. S. Mazzavini, New York broker, is shown here on the White Star liner Megantic, leaving for England after spending ten months on the North American Continent, in which time she wrote two 76,000 word novels and forty-five articles.

NEW STRENGTH FOR WEAK STOMACHS

Indigestion Disappears When the Blood Is Enriched

The most urgent need of all who suffer from any form of indigestion is a tonic to enrich the blood. Pain and distress after eating is the way the stomach shows that it is too weak to perform the work of digesting the food it takes. New strength is given to weak stomachs by Dr. Williams' Pink Pills because they purify and enrich the blood. This accounts for the speedy relief in stomach disorders that follows the use of this medicine. The value of this medicine in cases of indigestion is shown by the case of Mrs. George W. Johnson, Lequille, N.S., who says:—"I have no hesitation in recommending Dr. Williams' Pink Pills. I was greatly distressed with indigestion. Always after eating I suffered from pains in the stomach and other distressing symptoms. I tried different remedies, but without getting relief. I was advised by a friend to try Dr. Williams' Pink Pills, which I readily did, and I am feeling very grateful ever since to the person who gave me the advice. The very first box helped me and before I had taken a half dozen boxes I was restored to my former good health and all traces of this distressing trouble disappeared. It is now about a year since I took the pills, and I have not been troubled with indigestion since. I have taken every occasion to recommend Dr. Williams' Pink Pills to those in need of a medicine and shall continue to do so."

A little booklet, "What To Eat and How To Eat," will be sent free to anyone asking for it. You can get the pills from any medicine dealer or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

British Columbia Hop Yield

Yield For 1927 Double That Of the Year Previous

A total yield of 1,425,875 pounds of hops was secured from 1,037 acres in British Columbia in 1927. This was practically double the 1926 average, substantially the largest yield in the history of the industry. At an average price of 32 cents per pound the crop was worth $456,280. In 1928 an additional 332 acres of hops in the province came into bearing.

Pretty Cashier: "I think I need a holiday for the sake of my health. My beauty is beginning to fade."

Manager: "What has put that idea into your head?"

Pretty Cashier: "The men are beginning to count their change."

The gross area of the United States is 3,026,789 miles.

Druggist Gave Her Very Good Advice

Miss Ruth Horowitz, Bronx, N. Y., writes: "Having been troubled with indigestion caused by constipation for several months, my druggist advised a purely vegetable laxative pill.

I can safely say that since I am taking them, and only one each night, I feel like myself again and can eat most anything without fear of an attack."

The Standard of Quality Since 1853

University Of Alberta

New Laboratory and Greenhouse To Be Erected This Year

Increased accommodation is being provided this year in the department of field crops at the University of Alberta by the erection of a new laboratory and greenhouse for the study of plant pathology and plant breeding. This additional space will make possible the carrying out of a co-operative attack by the university, the federal department of agriculture, and the national research council on the problem of root-rot diseases.

Dr. A. W. Henry, formerly of the University of Minnesota, on his return from Europe last fall, joined the staff of the department of field crops and will lead the plant pathological work at the university. Dr. G. B. Sanford, of the federal division of botany, will have charge of the Dominion laboratory of plant pathology, and Dr. O. S. Aamodt, of the University of Minnesota, has been appointed to take charge of the work in cereal breeding. Dr. Aamodt will spend the summer in Europe, mainly at Cambridge and Svalof, and will take up his work at the university in the fall. Professor J. R. Fryer will continue in charge of forage crop breeding. Disease resistance is one of the main qualities being sought in the plant breeding work.

Newest Town In Northland

Cranberry Portage, Manitoba, Important Point On Flin Flon Railway

Cranberry Portage, which sprang into being almost overnight, is the North Country's newest town, and citizens believe it is destined to be one of the most important points on the Flin Flon Railway.

A month ago there was nothing there except railway construction offices and warehouses. Today it has a population of 100, with two hotels and a number of other thriving business establishments. A board of trade is being organized and soon there will be a mayor and regular municipal organization.

Within a mile of the town work is going forward on a number of mining claims.

Trained Fire Fighters For British Columbia

Experts Will Combat Fire Menace In Salmon Arm Section

When the fire menace again sweeps through the forests of the Salmon Arm section of British Columbia this summer, it will be combatted by men trained for just that emergency. The fire-fighting will be done by experts and not by novices.

The reason for that is that the men who will be employed in fire-fighting this season have literally gone to school again and have studied the most approved methods of reducing the hazard and beating the flames when they once get under way. Special subjects were taken up each day and included the study and demonstration of approved methods of disposal of slashing.

Ship Muskrat To Europe

What is believed to be a record for muskrat shipments from Canada has left on board the Canadian Pacific vessel "Beaverdale," bound for Antwerp. It consists of 149 muskrats, the foundation stock for muskrat ranches in Germany, Finland and France. The consignment was made up of 74 pairs and operated at, a muskrat farm at Lindsay, Ontario.

For Burns and Scalds. — Dr. Thomas' Eclectric Oil will take the fire out of a burn or scald. It should be at hand in every kitchen so that it may be available at any time. There is no preparation required. Just apply the oil to the burn or scald and the pain will abate and in a short time cease altogether.

A going clock is one that has been wound up, a going concern is one that hasn't been.

For Hay Fever—use Minard's.

Victim Of His Invention

Radium Paint Inventor Is Slowly Dying Of Poison

The New York Times says that Dr. S. A. Von Soschocky, inventor of the radium paint which is said to have doomed five New Jersey women to a slow death, is a victim of his own invention. The paper says that, although the doctor was reticent to talk about himself, marks of the inroads of illness were plainly evident. His front teeth are gone and his fingers up to the second knuckle are black, the result of radium necrosis.

The doctor has frequently risked his life in recent years to treat friends with radium.

Dr. Von Soschocky brought to this country with him several years ago the formula for the radium paint. He became an official of the U.S. Radium Corporation in whose plant the five New Jersey women are said to have acquired the radium poison.

They recently made a settlement with the company for $10,000 each, a life-time annuity of $600 each and insurance for their relatives when they die.

Recipes For This Week

(By Betty Barclay)

ECONOMICAL PUDDING

1 quart water.
1 teaspoon salt.
1 cup pearl tapioca.
1 teaspoon vanilla.
4 tablespoons butter.
1¾ cups brown sugar

Cook tapioca in water until transparent. Add other ingredients. Bake one-half hour.

LEMON DROP COOKIES

1-3 cup butter.
½ cup sugar.
1 egg.
¼ teaspoon soda.
2 tablespoons hot water.
½ tablespoon lemon juice.
Grated rind 1 lemon.
¾ cup flour.

Cream butter; add sugar, gradually, and egg, beaten until thick and light, soda, dissolved in hot water, lemon juice, grated lemon rind, and flour. Mix well, drop from tip of teaspoon onto buttered baking sheet, and bake in a quick oven.

To make crisp cookies, use one and one-half cups flour when mixing; chill thoroughly, roll very thin, sprinkle lighty with sugar, cut out, and bake.

20,000 passengers have been carried by one commercial airplane company, without a single accident.

Much of the experience a man gets comes too late to benefit him.

Is Enthusiastic Over Canada

Premier Baldwin's New Book Makes Many Kindly References To Canada

Much about Canada is found in the book issued by Premier Stanley Baldwin of Great Britain, comprising speeches made by him in recent years. References to this country begin with his deliverance on the day of landing at Quebec last July and are heard at the principal places he visited. But Mr. Baldwin talked of Canada long after he had quit her shores. What he said of her is quoted in this book, which is entitled "Our Inheritance," and is published in Canada by the Ryerson Press.

"The two civilizations," said Mr. Baldwin at Quebec, "two languages, two rich cultures, two great branches of the Christian religion, have gone to build up the civilization of Canada."

In one speech Mr. Baldwin summarizes his reactions to his visit to this Dominion. "There was not one single spot," he said ,"where I stayed in Canada—east, west or in the middle—that I did not feel absolutely at home and where I could not have settled down for the rest of my life with perfect happiness and contentment."

At times he expresses his amazement at what he saw, but more at what he saw had been done. Speaking in Scotland of his trip, he said: "What strikes one is not so much the immensity of the country and the variety of development possible, but the results that have already been obtained by a population comparatively so small—even now under ten millions—covering over 3,500,000 square miles." . . . "One more impression is the faith that all Canadians have in the future of their country and their buoyant optimism."

In another speech Mr. Baldwin speaks in a tone of farewell, a leave-taking regretted. "I found," he says in one of the speeches now published, "that Canada cherishes what I regard not only as the best of our ideals, but those which are absolutely necessary to be cherished if a democracy is to survive and is not to become anarchy and chaos. I found that Canada is maintaining the standards and the value of education. In Canada the work in the universities in the east is as good as the work in the best universities of Europe. I cannot tell you what it is to go out from Europe into a country that not only has no hereditary problems hanging like millstones around its neck, but where everyone is full of hope and where I met no 'grousers.' Canada has an enormous future before her, but if it be no impertinence on my part to say one word to Canadians I would say, 'The future is with you; do not be in too much of a hurry. Your country is a country for men from the north, the hardy, virile races. Quality before quantity any day. Build up with the best. What does it matter if it is 100 years or 200 years or more before your country is full?"—Manitoba Free Press.

Strange But True

Mrs. Jones: "Oh, Mrs. Brown, how awful to hear of Mrs. Johnson's death, and she only came to our house last night to borrow a book for her husband."

Mrs. Brown: "It is really awful; and you remember her sister was ill for years before she died."

Mrs. Jones: "It seems very funny; some people die all of a sudden. And some live till the last minute."

Mining In Prairie Provinces

While the Prairie Provinces are for the most part agricultural in character, minerals, including coal, equal in value to about twelve and a half per cent. of the total mineral production of the Dominion are produced therein.

South Africa has suffered from locusts a thousand times more than it ever suffered by reason of all the wild beasts within its borders.

"We swore when we married that we would suffer together, and so now my wife has the toothache she is playing the piano so that she shall not suffer alone."—Pele Mele, Paris.

W. N. U. 1738.

To Combat Grain Rust

Suggestion Is Made That a Million Dollar Prize Be Offered For a Remedy

Discussions of the means to be taken to combat the rust problem which is facing Western wheat producers, and of so-called "paternal legislation" and its effect on Canadian industry, featured a session of the 57th annual meeting of the Canadian Manufacturers' Association.

The convention decided to refer the problem of rust prevention to the executive committee and to empower this committee to support any movement undertaken by any other body to have the Dominion Government further encourage research work.

T. R. Deacon, Winnipeg, called attention to the ravages of rust in the wheat fields of Western Canada. Western wheat added new life blood to the Dominion every year. The output could be doubled if production were not hampered by disease. Manitoba, Mr. Deacon asserted, was rapidly becoming a non-wheat producing province and the problem of rust was becoming more serious each year.

Mr. Deacon referred to the work being done by the rust research laboratory and held that the salaries paid men in this work were not adequate. As a result of this, some of the best men had left to engage in other work.

Mr. Deacon asserted that something spectacular should be done to call world-wide attention to the menace from rust. He suggested that important bodies in Canada should pass resolutions asking the Dominion Government to offer a prize of $1,000,000 to any person or persons who could provide an adequate check to rust.

He pointed out that a reasonable estimate of the loss from rust yearly would place it at between twenty-five and fifty millions. The prize would therefore be a small fraction of the loss in one year.

Burnt-Out Lands

Can Be Made To Produce Fair Crops Under Proper Cultivation

In certain sections of the Prairie Provinces and more particularly in South-western Saskatchewan and Southern Alberta, the surface contains many irregular but roughly circular depressions varying from three to six inches in depth, and from a few feet to twenty feet or more across. These depressions are known under such various names as "burnouts," "blow-outs," or "slick spots." The depressions are usually bare or support a scanty growth of vegetation, while the surrounding prairie is well clothed in grass. The soil of these spots is usually very fine and is almost as impervious to water as the firmest clay. The method of treating these spots is described in Bulletin No. 98, of the Department of Agriculture, at Ottawa, which states that when these spots are not extensive they can usually be made to produce fair crops under cultivation in favorable seasons. In ploughing through these areas the operator has to carefully guard against the plough slipping over these places. When ploughing is well done it has been found to be good practice to mix the normal prairie soil with that in the "burnouts." In ordinary farming practice it is observed that without any special treatment the burnt-out spots get smaller and smaller from year to year. The cultivation of the land by the modern powerful machinery usually quickly overcomes these burnouts."

Only One Pair

She was one of those women who wanted to see everything in the shop, without regard to the trouble she caused or the time she wasted.

She was looking for socks, and the obliging salesman had turned out the contents of every box and drawer he had in the shop.

"There, madam," observed the salesman, regarding the mass of gaily-colored hosiery, " you have our entire stock."

"Is that all you have?" asked the woman, in disappointing tones.

"Yes, madam," he answered, and added thoughtfully, "except the pair I have on, of course."

Our Largest Structural Timber

The largest structural timber grown in Canada is produced by the Douglas fir. The wood of this tree is one of the hardest, heaviest, stiffest, and strongest of all native Canadian timbers, and consequently great quantities are used in bridge-building, wharf construction, and heavy framework of all kinds.

Diner—"The price of four pigs' feet is only 30 cents. Why are you charging me 60 cents for just five?"

Waiter—"Because that forced us to kill another pig, sir."

PRESENTED AT COURT

Hon. Georgiana Curzon, only daughter of Viscount and Viscountess Curzon, and a granddaughter of Earl Howe, was one of the most beautiful girls presented at the recent royal court in Buckingham Palace.

Disposes Of One Difficulty

Tourists In New Jersey Shown Direction By Telegraph Poles Banded In Colors

Motorists who travel into New Jersey henceforth will have one touring difficulty disposed of—that of being sure in which direction one is travelling.

On cloudy days, and even on fair days during the middle hours of daylight, it is not the easiest thing in the world for a driver to establish the points of the compass in strange territory.

This is the plan put into execution in New Jersey: Telephone and telegraph poles are banded in colors. These colors indicate direction as follows: Blue, north and south roads; red, east and west roads; yellow, northwest and southeast roads; and brown, northeast and southwest.

Growth Of Forest Industries

Canada has made rapid progress in the development of her forest industries and has lately taken first place in the matter of world's newsprint production. The wise conservation of the forest resources of the Dominion, particularly the reduction of losses through preventable forest fires, and the encouragement of systematic reforestation and tree-planting schemes, have been increasingly urged upon the attention of the general public.

A Rooster Day

No Justification For Keeping Roosters In the Laying Pen

The male bird in an egg producing flock is regarded by those who understand, to be as utterly useless as a fifth wheel on a wagon, or a second tail on a dog. Many poultry raisers, particularly owners of small flocks have learned that the male bird is not only useless but an expensive addition to their stock. The editor of the Renfrew "Mercury," a paper that is taking an interest in the upbuilding of the poultry industry, recommends the establishing of a "Rooster Day" in every neighborhood, to be regarded as the time of year when the male birds should go to make pot pies. Farm flocks that hatch their own chickens could very well have disposed of the roosters when the last batch of eggs was set. To keep them longer is to incur losses by the depreciation of the fertilized eggs. A leaflet of the Department of Agriculture, at Ottawa, on the subject of the removal of male birds from the flock, points out that the best trade in many cities in Canada offer a premium of from one to five cents per dozen for non-fertilized eggs. This advantage added to the saving of feed that roosters need justifies the marketing of the roosters in the farm flocks of the country.

An Ancient City

City Of Rome Has Just Celebrated Its 2,681st Birthday

It sounds strange to hear of the 2,681st birthday of a city, but that anniversary has just been celebrated in Rome; and it is interesting to note that the occasion was utilized for the inaugural sitting there of the First National Congress of Roman Studies. Other things happened, such as that everybody carried a flag and as that 70 bands played in 70 piazzas. Moreover, new schools were opened, public gardens were dedicated and the airport, Littorio, in the northern campagna, was put to use for the first time. As Romulus said to Remus, it's a live-wire town ,all right.—Philadelphia Record.

Four Provinces Share Honor

Triplets were born in four Canadian families during last November, the report of the federal bureau of statistics state. One set of triplets was born in each of the provinces of Ontario: Quebec, New Brunswick, and Alberta.

When people marry for money that is all they get.

I Can Prove It

By Gregory Clark

When cameras were invented, anglers believed the end had come. Here was a form of proof that no honest fisherman could deny.

But it did not take anglers long to discover how to beat the camera. In fact, by holding a fish slightly towards the lens, and in front of the body, a man could do better with the camera than he could possibly do with mere words.

Nowadays an angler who cannot perform miracles of confirmation with a camera is not a "compleat" angler at all.

It is the motion picture camera that bids fair to stump the fisherman. And now that they have little pocket movie cameras that can go into any tackle box, and which cost no more than a fly rod, it looks as if fishermen have come to the end of their tether.

There is always sure to be somebody in every fishing party who will secrete one of these little betrayers in his dunnage. We will come home from our trips and tell our adventures honestly and in large detail, as fishermen do. Then the villain in the party will invite a large gathering and show the actual scene.

But a movie camera of the vest-pocket or tackle box variety came in very handy for me last season. A party of us went up to the Canadian Pacific French River Bungalow Camp a few days before the opening of the bass and lunge season for the purpose of talking to guides and Indians about the change of the Ontario bass season to July first, and to get some first-hand information about the breeding habits of bass. There were plenty of pickerel in the rapids and I was for having a few on plugging tackle.

My first cast hooked not a pickerel but a twenty-five pound muskie.

What a mess I was in! A dozen witnesses to my perfidy, and I a champion of tight seasons and smaller bag limits!

I called for the little camera. It came, in the hands of a trembling amateur. I ordered him to press the button and commit to film for posterity and forever, my deed. I played the muskie—not for sport, but in order to remove that plug from his jaws. He leaped. He bored. It was all duly filmed, amid shouts and silences of my friends, the witnesses, gleeful witnesses, of my fall from anglers' grace.

At last I tired the monster, I ordered the Indian to lift him tenderly, to remove the plug from his jaw. And then, with the little outfit still buzzing merrily away, I ordered the Indian to let the twenty-five pound musky go free!

And all this is on record in a hundred feet of half-inch film which I guard as the salvation of my reputation.

The movie camera may mean the end of the good old days, as far as free speech amongst anglers is concerned. But it also saves reputations.

VANISHING WILD LIFE

Sole Survivors Of Many Types Rapidly Becoming Extinct

Each century marks the disappearance of some creature of the wilds whose race has died out.

The last passenger pigeon in the world died not long ago of old age in the New York Zoological Gardens. It was the sole survivor of a race which, only fifty years ago, was so numerous that their flights darkened the sky and broke down the branches of forest trees by their weight, says a Tib-Bits writer.

The American buffalo—or, rather, bison—nearly shared the same fate. That it has survived is due to the Canadian Government, which preserved a few in Wainwright Park Reservation, where they have multiplied so wonderfully that now there are eight thousand of them.

The European buffalo lived in South Russian forests up to the war, but now not one is left in that country. Happily a few live in captivity in the Duke of Bedford's park, at Woburn, and elsewhere, so the stock may be preserved.

The elephant seal of Guadeloupe is found on that island and nowhere else. There are very few left, and if steps ore not taken to preserve them the species will be lost to the world.

The lovely sea otter of Alaska has been so hunted for its fur that it is almost extinct. It is the only salt-water otter, and a beautiful playful creature whose fur is the most wonderful in the world. But there is very little hope of its being saved.

In the Galapagos Islands, off the North-West Coast of South America, are found the giant tortoises, the longest lived of all known animals. These strange, sluggish reptiles are survivors from a long-past age, but owing to the fact that dogs have run wild on the islands, and now devour the eggs and the young of these monsters, they are fast disappearing. The curious Heerman gull of the Pacific Coast is being exterminated by egg robbers, and the great walrus of the North Pacific is being destroyed by hunters.

Good Advice To Follow

Take Care Of Children and Town Will Take Care Of Itself

The Duke of York, who is taking a full share of the responsibilities and duties of his royal office, offered a slogan to the Town of Pudsey, in Yorkshire, during a visit there. "Take care of the children and the town will take care of itself" was the sound epigram he offered.

It would be difficult to find saner advice. If every possible effort is made to promote and conserve the health of the children, by adequately safeguarding their sources of food, by ensuring them a hygienically clean supply of milk, by housing them in homes where fresh air and sunshine have free entrance, by providing playgrounds for them where under proper supervision they can learn to play games in manly fashion, by exercising a wise supervision over their studies and the rooms in which the lessons are given, the Town of Pudsey and every other city, town and village in the world, will improve living conditions and build up a stronger, a healthier and a more self-reliant nation. No sum expended on any public service returns richer dividends than the dollars appropriated for public health and the care of the citizens of tomorrow. The message delivered to Pudsey might profitably be broadcast throughout the world.

Suggests Canadian History Of Great War

Should Be More Than Mere Dates, Says New Brunswick Premier

Hon. Dr. J. B. M. Baxter, premier of New Brunswick, in his address of welcome to the delegates attending the second annual Dominion convention of the Canadian Legion of the British Empire Service League at St. John, N.B., made a strong plea for a Canadian history of the Great War for use as a text book in the public schools.

Such a book, he said, should contain something more vital than mere dates and not be merely a record of achievements, but instead a record of the soul that made them possible.

Sir Percy Lake, Dominion president, formally opened the convention and an impressive feature of the ceremony was the unveiling of a beautiful portrait of the late Field Marshal Earl Haig, grand president of the British Empire Service League, by the president, followed by two minutes silence in honor of the departed leader.

Golf Pro: Well it's a funny thing. Your stance is all wrong, but your form is wonderful.

Pretty Golfer: Of course. I've got to diet carefully to keep it like that.

Assured Of Good Future

Farmer With Agricultural Education Bound To Succeed

"There is going to be an ever increasing demand for brains on farms in Canada," stated Duncan Marshall, former Minister of Agriculture, not long ago. "The man who gets a good agricultural education is assured of a good future." This statement is appropriate, in connection with the celebration of its twenty-first birthday by the Manitoba Agricultural College. At such a time one is forced to reflect on the intimate manner in which the agricultural college has come to enter into the life of the farming population of Canada; how its work has been bound up in the agricultural progress of the Dominion, and the remarkable way in which agricultural education in Canada has attained such a high international standing which has created a very wide demand for its graduates.

In 1874 shortly after Confederation and prior to the opening up of the west to farming settlement, a farming college was established at Guelph, Ontario, which pioneered agricultural education in Canada. In its first half century's work, over 25,000 young men and women passed through the college, and when a few years ago it celebrated its semi-centennial, some of the most distinguished men in agriculture on both sides of the border returned to it as their Alma Mater. The Manitoba Agricultural College was the pioneer in Western Canada and its accomplishment broadly symbolizes what agricultural colleges are doing in that territory. In the twenty-one years of its existence over 3,000 students have enrolled in the regular courses. A total of 209 young men have graduated with the degrees of Bachelor of Scientific Agriculture, and 91 young women with the degree of Bachelor of Home Economics.

Agricultural colleges have now been established in all provinces, adequately serving the needs of the followers of the Dominion's first industry. They enter in the most intimate manner into the life of the farm and are at the complete service of rural communities. Their work broadly is to bring about more efficient and profitable farming and they use every means to achieve this end. It is significant that 54 per cent. of the graduates of the Ontario Agricultural College at Guelph have returned to the farm, while many of the remainder are to be found filling high agricultural positions in all parts of the Dominion and in the United States. It is further interesting to learn that in spite of a considerable demand for their services elsewhere 85 per cent. of the students at the Manitoba Agricultural College have resumed farming activities at the conclusion of their courses.

Economies Large and Small

Many People Save Only To Waste Later On

Most people have "pet" economies with one it is hoarding stray pieces of string; with another saving of odd scraps of soap for use on washing day; with another walking to save train fares; and so on. All these economies are good if the same care is used in managing the bigger items of expenditure; but this is not always the case. For instance, many people save carefully all the year and then in one fortnight (the annual holiday) waste the whole sum without a thought. Economy should affect both the big and little affairs of life.

When carefulness degenerates into meanness it is an enemy to one's own happiness and to the pleasure of all with whom one is concerned.

Would Eliminate The Cow

Milk without cows will be the next short cut of science, according to a statement by Alfred King at the Sanitary Inspectors Association meeting at North Allerton, England. Experiments are now being made at Billingham, Northumbeland, looking toward the production of synthetic milk direct from grass by a process that eliminates the cow.

She: "That is my old house cat I have had it ever since I was a girl."

"Heavens! I didn't know they lived to such an age."—Il Travaso, Rome.

ITCHY PIMPLES AFFECTED FACE

Also On Neck and Body. Healed by Cuticura.

"Eczema broke out in pimples and affected my face, neck and body. It itched and burned so that I was all the time scratching. My face was disfigured, and my clothing used to rub against the breaking out on my body and aggravate it. I could not get any sleep on account of it. The trouble lasted a couple of months.

"I began using Cuticura Soap and Ointment and they afforded relief in about a week. I continued using them and in three weeks I was completely healed." (Signed) Miss Rosie Whitman, Beaver Harbor, N. S.

Rely on Cuticura Soap and Ointment to keep your skin clear.

Sample Each Free by Mail. Address Canadian Depot: "Stenhouse, Ltd., Montreal." Price, Soap 25c. Ointment 25 and 50c. Talcum 25c.

Cuticura Shaving Stick 25c.

WORLD HAPPENINGS BRIEFLY TOLD

The Government of India has accepted the invitation of Secretary Kellogg to participate as an original signatory in the proposed multilateral treaty for the renunciation of war.

Marshal Chang Tso-Lin, war lord of Manchuria, who recently was driven from Peking, has died in Mukden according to unconfirmed Japanese war office advices received at Tokio.

Miss Eleanor Lodge, a sister of Sir Oliver Lodge, noted scientist, is the first woman to receive the degree of doctor of literature from the Oxford University. She is 59 years of age and a well known historian.

Kroum D. Dokoff, chief inspector of hygiene and labor in the ministry of commerce, industry and labor, Bulgaria, is visiting Canada studying industrial hygiene and accident prevention.

President Gaston Doumergue, when visiting Rheims, the most bombarded city of the Great War, took occasion to approve Secretary Kellogg's anti-war pact. He said that France will associate herself with all efforts to put an end to warfare.

Viscount Byng, former Governor-General of Canada, has taken his seat in the House of Lords after 20 months delay through the dispute concerning the payments of fees incidental to his elevation to the peerage.

Captains Charles Kingsford-Smith and Charles Ulm, co-pilots of the Southern Cross, have been offered huge sums to appear in theatres, but they have declined to commercialize the flight, thus following Lindbergh's example.

An air mail service between Montreal and Albany, N.Y., will probably be established in the near future, according to an announcement made in the House of Commons by Hon. P. J. Venoit, Postmaster-General. He thought that the contract would be let within a short time.

Captain Darbos, who flew the first French airplane on the war front which was equipped with a machine gun and to whose experiments the adoption of machine guns in war aviation was in a large measure due, was killed in a crash near Oran in Africa.

Records Are Remarkable

Several generations of two or three Japanese families have kept records of dates when bamboo bloomed, and it is found that certain sorts flowered once in 120 years simultaneously with others which flower once in sixty years.

Corns are caused by the pressure of tight boots, but no one need be troubled with them long when so simple a remedy as Holloway's Corn Remover is available.

Each automobile worker produces more than three times as much now as he did before the war.

For Rheumatism use Minard's Liniment.

A promise is but a small outlay from which large returns are expected.

Athletes.

For sprained ligaments, bound muscles, kicks and bruises — use Minard's.

MINARD'S "KING OF PAIN" LINIMENT

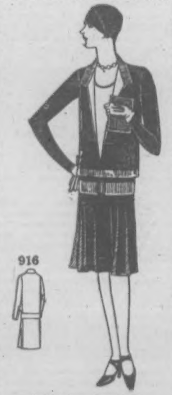
W. N. U. 1738

Consumption Of Meat In Canada

Figures Go To Prove That Pork Is the Favorite Meat

Pork is the favorite meat of Canadians, according to a recent compilation on the meat and poultry consumption of the people of the Dominion made by the Canadian Government Bureau of Statistics. The daily consumption of meat and poultry in Canada is about 7 1-5 ounces for every man, woman, and child. This means an annual consumption of 775,150,815 pounds of pork; 654,543,623 pounds of beef; 58,191,717 pounds of mutton and lamb; 63,335,591 pounds fowl and chickens; 14,138,558 pounds turkey; 4,886,890 pounds duck; and 9,863,980 pounds geese. In addition there is an annual per capita consumption of 29.67 dozen eggs, of a total of 282,405,692 dozens. Canada's egg bill alone is valued at over $113,000,000 annually. The per capita annual purchase of meats is 81.43 pounds of pork; 68.76 pounds of beef; 9.69 pounds of poultry; and 6.11 pounds mutton and lamb. This represents half a heavy hog, a small hind quarter of beef, two chickens, and a loin of lamb for every member of every household in Canada, an expediture at average prices of the different commodities of $43.09 per person, per year. For the whole of Canada this would amount to approximately $410,173,710 exclusive of the $113,000,000 egg bill.

Winnipeg Newspaper Union Fashion



Outstanding Smartness

An interesting type with bolero front and deep V-opening completed with vestee. The lower edge of the bolero is finished with applied bands. The skirt at front shows the new circular fulness, the back is straight in one piece and the set-in sleeves are dart-fitted. Style No. 916 is stunning made of the two surfaces of black crepe satin, one of the new supple woollen, two tones of georgette crepe. Sizes 16 years, 36, 38, 40, 42 and 44 inches bust. Size 36 requires 4⅝ yards 36-inch, or 3 yards 54-inch material; ⅝ yard 20-inch white and ⅝ yard 32-inch striped material. Price 25 cents the pattern.

Many styles of smart apparel may be found in our Fashion Book. Our designers originate their patterns in the heart of the style centres, and their creations are those of tested popularity, brought within the means of the average woman. Price of the book 10 cents the copy.

Work Of Fuel Board

The Dominion Fuel Board since its inception has conducted exhaustive studies with a view to making Canada independent in the consumption of fuel, with the result that Pennsylvania anthracite is being displaced by other fuels in Ontario and Quebec to the extent of 1,500,000 tons a year. Another beneficial feature is that a variety of fuels has established competition in the markets of domestic fuel supplies.

It is estimated that 100,000,000 people speak Russian.

STUDEBAKER PLANT AT WALKERVILLE, ONT.

The Walkerville Plant of the Studebaker Corporation of Canada, Ltd., where the Studebaker and Erskine Cars are manufactured, is now a purely Canadian concern, employing Canadian labor, and using Canadian material. Studebaker and Erskine cars are becoming increasingly popular throughout the Dominion.

Studebaker To Build Canadian Automobiles For Canadians

Friendly Divorcement Of Canadian Organization From Studebaker Corporation Of America

With the announcement of a far-reaching reorganization of both administrative and manufacturing policies, the Studebaker Corporation of Canada, Ltd., has assumed a front rank position among the Dominion's largest independent manufacturers. The announcement, which indicates a friendly divorcement of the Canadian Studebaker Organization from the Studebaker Corporation of America, was issued by A. R. Erskine, president of both industrials.

The new Studebaker organization will be directed by D. R. Grossman, formerly sales manager for Studebaker in the Dominion. Mr. Grossman's title will be vice-president and general manager. Having been associated with Studebaker in Canada for the past six years, Mr. Grossman is well known to the Dominion's automotive leaders.

"The motive behind the reorganization is to be found in our desire to build Canadian Automobiles for Canadians," says the statement. "The Studebaker Corporation of Canada, Ltd., is Canadian. We will use more and more of Canada's great supplies of raw materials. Not only will our consumption of these commodities be increased, but new commodities will be added to our purchasing agent's order lists.

"We want to build automobiles for Canada and we want Canadians to approve of them. It is felt that the time has come to go ahead and no time will be lost in increasing the number of cars actually built in Canada. We hope to secure greater efficiency than has been possible in the past, which will result in greater automobile values for Canadian purchasers.

"Continuing the precedent already established, the personnel of the Canadian organization will be almost exclusively Canadian. In addition, present plans contemplate that advertising and printed matter shall be prepared in Canada, and, in short, a large percentage of every dollar spent in connection with the Canadian business shall be paid to Canadian individuals and Canadian firms.

New Studebaker Organization

D. R. Grossman, vice-president and general manager.

"The new arrangement will mean a gradual increase in the number of employees at the Walkerville plant. Branches are now maintained at Montreal and Calgary. These will also be greatly increased.

"This move is a result of Studebaker's faith in Canada," said Mr. Grossmon recently. "We believe there will be wonderful developments in this country and through this expansion program, we will naturally become a part of those developments."

Says Food Affects Eyes

Chicago Specialist Believes Defects Can Be Remedied By Diet

Farsightedness, which comprises 75 per cent. of eye defects, can be relieved by proper diet, according to Dr. C. A. Harkness, Chicago eye specialist.

"I have not collected positive data," Dr. Harkness said, "but from numerous observations in private practice and in clinic I believe diet affects the sight.

"A diet of such foods as milk, tomatoes, orange juice and cod livers will diminish the distorted shape of the eyeball 50 per cent. in three months.

"All children under 10 whose sight is defective are either under-nourished or underfed. Diet can restore the sight to a better degree of normality."

The Level Road

The peril of the level way is greater than the peril of the hills. There is nothing more exhausting than a dead level stretch, unbroken by change. More people break down beneath the monotony of life than beneath its changes. There is scarcely a greater achievement than the victory of the man who keeps fresh and vigorous on the level road.

There are a few things that money cannot buy, but not many people want them.

Improved Guide For Airmen

New Radio Beacon Will Chart Course For Trans-Ocean Fliers

Trans-ocean fliers of the future, will be able to fly a course definitely charted by means of an improved type of radio beacon which has an absolutely fixed wave length, it has been announced at the Radio Aircraft laboratory at Dayton, Ohio.

Captain Paul S. Edwards, Signal Corps, U.S. Army, in charge of the laboratory said:

"The signal corps here have made improvements in beacons which increase its efficiency 100 per cent. over the old type.

After 10 Years Of Asthma Dr. J. D. Kellogg's Asthma Remedy proved the only relief for one grateful user, and this is but one case among many. Little wonder that it has now become the one recognized remedy on the market. It has earned its fame by its never failing effectiveness. It is earning it today, as it has done for years. It is the greatest asthma specific within the reach of suffering humanity.

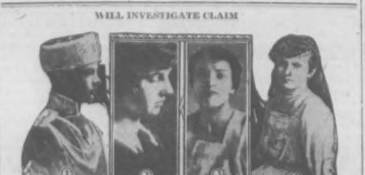
Piff: "Was it a bad accident?"

Bing: "Well, I was knocked speechless and my wheel was knocked spokeless."

Some women wear gloves most of the time and others have diamond rings.

Friendship and confidence are plants of slow growth.

WILL INVESTIGATE CLAIM



The claim of Madame Tchaikowsky, Russian refugee, that she is the Grand Duchess Anastasia, daughter of the late Czar of Russia, is once more under investigation. Grand Duke Andre (No. 1), is sailing to America at the request of Mrs. W. B. Leeds (No. 2), whose guest Mme. Tchaikowsky (No. 3) is, in an effort to determine her identity. No. 4 is the last photograph of Grand Duchess Anastasia before her reported death at the hands of the bolsheviks ten years ago.

Canadian National Railways' Tour To Great Britain and Denmark, 1928

(Continued)

It was just a step to Canada House and a reception by the Hon. Peter Larkin, High Commissioner for Canada. We were all impressed by the appearance of Canada's headquarters in Great Britain. Overlooking Trafalgar Square, Canada House occupies one of the most commanding sites in London, and does honor to our Dominion. There was no formality, no speeches, just a friendly handshake and a few words for all in the private room of the high commissioner.

Now came the event of the day, the reception at St. James'. It was not without awe that we entered this simple stately palace of red brick after passing its castellated, gateway guarded by sentries wearing the famous busby. This palace which we Canadian farmers were entering had been the home of Charles the First, and is today the scene of Levees and Privy Councils. We mounted the beautiful stairway to the Entree Room. A short wait and the Prince was in the Audience Chamber ready to meet us. The door opened. There was His Royal Highness, not seated but standing at the entrance with a smile of welcome. We were introduced by Mr. Groff who performed a feat of memory by remembering all our names.

The Prince had a handshake, a smile and a few words of greeting for every member of the party, but his friends and neighbors from Alberta were specially honored. Mr. William Sharpe, who once played the pipes at a party on the Prince's ranch, was at once recognized by His Royal Highness, who asked Mr. Sharpe if he had brought his kilt. The Prince asked Mr. C. H. Marshall how their mutual friend 7U Brown was getting on, and Mr. P. J. Tooley, of the Peace River, was questioned about Peace River problems and the probability of railway connection with the Pacific Coast. The interest of the Prince in Canada was spontaneous and real, and we were delighted with his evident regard for our great Dominion.

After the reception we were shown through the Armoury, Queen Anne's Drawing Room, the Tapestry Room, the Throne Room, and the Picture Gallery, with its Royal portraits dominated by the paintings of King Henry the Eighth at one end of the room, and Queen Victoria at the other.

Our next appointment was at Harrod's great stores where we were entertained by Sir Woodman Burbidge, head of this great firm, to lunch, afterwards visiting the Provision Shop and some of the factories of this great establishment. Harrod's is perhaps the finest department store in London and its provision shop is a model for such establishments. Canadian products have a prominent place in it.

Our official day concluded with a visit to the London Headquarters of the Danish Bacon and Co-operative Trading Company through which passes a large part of the Danish bacon supplied to the British market. In a single fortnight as many as 400,000 sides have been received and distributed from this one plant. Besides acting as a distributing centre the company operates thirty smoke-houses. It was interesting to learn that a thick pitch-like substance which encrusts the walls, the result of many years' deposit, imparts to the bacon much of its aroma and flavor. The deposit is caused by the volatile oils which bacon sides exude while curing.

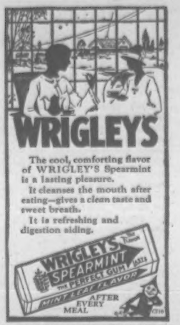
Non-resinous wood is used in the smoking process. Shrinkage during the curing process is approximately 7 per cent.

Every bacon side bears several stamps which permits the Danish Bacon Co. to trace the origin and date of killing of every piece of meat that reaches its establishment and obviates any possibility of bacon being distributed which may have been held up over long at the producing point, or shipped too soon to take advantage of satisfactory conditions. The sides are graded by experienced men who, through long association with the British market, know accurately the requirements of each of the customers of the Trading Company.

The Danish Bacon Co-operative Trading Company is an example of a combined producer-consumer co-operative organization. Half of the capital stock is in the hands of 10,000 retailers, large and small, scattered throughout the British Isles, the other half is owned by 17 Danish Bacon Factories which supply the carcases. Such an organization, bringing together as it does, a single distributing body, the producers and consumers of a given commodity, lends to the Company great internal strength.

The Company in London undertakes to accept all suitable bacon as it is shipped from the 17 factories in Denmark, and it is its proud boast that it has never refused to handle all supplies shipped to it regardless of the condition of the market.

(To Be Continued.)



WRIGLEYS

The cool, comforting flavor of WRIGLEY'S Spearmint is a lasting pleasure.

It cleanses the mouth after eating—gives a *clean* taste and sweet breath.

It is refreshing and digestion aiding.

Canadian Boys Are Best Empire Shots

Won Special Challenge Trophy in 1927 Rifle Shooting Competition

Canada won the King's special challenge trophy for 1927 in the miniature rifle shooting competition for boys of the British Empire. Canada's average for 3,000 boys who competed was 79.2 points out of a possible 100.

The King has sent a message to the secretary of the National Rifle Asociation under whose auspices the competition was conducted, congratulating the Canadian boys on "their first and well-deserved victory.'

The King's challenge trophy is awarded for a match between the full strength of the youth of Great Britain and the British Dominions. All the competitors must be under 19 years of age, and they shoot for the trophy in their own countries. In connection with the competition, the National Rifle Asociation presents medals to all individuals who have made scores of outstanding merit.

Breaking Into Market

Mission District, B.C., Competing Successfuly With U.S. Vegetable Growers

Some $40,000 of forced rhubarb was raised this year in Mission District, B.C., ten cars being shipped to prairie points and the balance to the coast cities. The forced "barb" is now being followed up by rhubarb grown in the open fields.

By shipping mixed carlots, which included cauliflower, spinach, cucumber, radish and green onions with the rhubarb, the Mission growers have been able to compete with the Walla Walla growers which have hitherto controlled this market.

Next season Mission growers hope to pack all their rhubarb at one central place instead of every man having his own packing house. By this means the crop will be standardized and only "Fancy" and "No. 1" will be shipped. A new and attractive label is being prepared for next season's crop.

GREAT PRAISE FOR BABY'S OWN TABLETS

The Dr. Williams' Medicine Co. have received the following letter from Mrs. Griffith, of 21 Merchison Ave., East Hamilton, Ont., concerning her experience with Baby's Own Tablets:

Dear Sirs,—I wish to thank you for the handy little booklet you sent me on the Care of Children. My baby boy was six weeks old when I first used Baby's Own Tablets, being new to Canada, but since the first proof of their many uses in bringing up a family, I have never been without them, for they are worth their weight in gold. There is no trouble in getting the little ones to take them and they often prevent an illness if taken in time. My first baby is now, at the age of four and a half years, a picture of health, and my nine-months-old baby is also well and happy. They are both a real good sample of what Baby's Own Tablets can do, for I have never yet needed a doctor for either of them."

The booklet to which Mrs. Griffith refers is entitled "Care Of the Baby," and treats with what a mother ought to know for baby's sake. A copy of the booklet will be sent free to anyone requesting same from The Dr. Williams' Medicine Co., Brockville, Ont.

Toronto is to have a corn-borer inspector, but what is really needed is an official to get after folks who borer books and never return them.

Among the chief uses to which lead is put is its conversion into white lead, which is the most reliable base for nearly all paints.

Every Fibre of Every Cord Insulated with Rubber.

Strengthened For Extra Long Mileage

Gum-Dipping, the exclusive Firestone process, impregnates and insulates every fibre of every cord with rubber, building into Firestone tires longer service by strengthening the side walls to withstand the extra flexing strain.

Let the nearest Firestone dealer put these sturdier, easier riding tires on your car now. He will save you money and serve you better.

CHAPTER XXVI.—Continued

Mr.s Kalinski looked very smart in her black satin tea-gown and gold embroidery that her Isadore had brought from the store. She took her neighbour into her confidence. "No matter what I could say, mind you! The woman said she paid seventy dollars for it once, and Isy got it for fifteen. She wanted thirty, but Isy told her it was the worst thing to sell. Who was wearing tea-gowns now?—they was out of date like leg o' mutton sleeves. And all the time Isy was thinking of me. I had a red cashmere one with Watteau pleats when our Rachel was comin', and his papa says little Isaac will be served as good, even if it did cost fifteen dollars and could be sold for thirty easy. He's that good a man, and spares no expense in reason."

Mrs. Corbett brought the tea from the kitchen and filled the cups. "You and me are lucky women," she said, "to have two good men like we have. Ain't some of them the easy goin' divils, though? I don't know what to think of Helmi's man, though she sticks up for him and is afraid he's been lost in a storm or drowned in a river. Poor girl,—it's a shame to see her havin' to work in a Chinks, but what could the poor girl do? Not one of these dainty ladies would have her, they all had some reason."

"If she were just a Hebrew girl, now," said Mrs. Kalinski, "one could go to the Hebrew Association of Women and they would find a place for her. We would not have any nice white girls of ours workin' in a Chinese shop and havin' to take lippy talk from every Harry, Tom, Dicken, and maybe worse. Mrs. Sternborg and Mrs. Swartz are grand on that, and good girls they have found for our people."

Mrs. Corbett paused, with her saucer half way to her mouth. "Look at that now! Ain't the Jews wonderful to think of things? We've got grand societies, too, and I never once took thought of them. Sure we've got societies. They're all up to their eyes in pneumonia jackets and many-tailed bandages now, and socks for the soldiers, but they're grand women, too. When I came here first I used to take care of the Club room at the "Y" and I used to see them there millin' round, very civil spoken women, too, and tryin' to make the world better, and God knows it needs it: I'll go to Mrs. Bell, the old lady, and I'm glad you spoke of this, Mrs. Kalinski. Maybe we can get a decent place yet for Helmi, though if she takes the baby away I don't know what I'll do with Rose and Dan."

Mrs. Corbett went that evening, after Helmi had gone eo work, leaving the baby to the watchful care of Rose, who sat in No. 18 to do her lessons.

Mrs. Bell was at home, and would speak of Helmi's case at the meeting of the Lloyd George Chapter the next day.

A week later a new place was found for Helmi. Mrs. Bell said it was an ideal place, and while ten dollars a month was very little, still it was not every place she could have the privilege of keeping her baby, and Mrs. Herriott would be very kind to her. Mrs. Herriott was young and inexperienced, and found her baby a great care. Helmi could mind the two babies and Mrs. Herriott would do the work.

Old Sam was sorry to part with Helmi, and gave her a feather fan. "You come back some day—old Sam be glad. Good girl—cally tray—teachee make chop suey—come back! You come see my girl too, and have chop suey."

Helmi paid her rent at the "North Star," and had three dollars left.

The Herriott home was a six-room bungalow on 127th Street, three blocks from the car line on 121th Street. It was a little house, low-roofed, square, with but little pitch in the roof, and high pillars in front, much too high for the height of the house, giving one the sensation as Helmi thought of seeing a cow getting up hind legs first. Rosie and Danny conducted her to the place, Rosie carrying the baby and Danney helping Helmi with the heavy valise.

"I hope you don't like her," said Rosie, "and then you'll come back. I'll bet her baby cries more than ours, and just when you get little Lili asleep, her kid will wake up whinin'. Well, anyway, Helmi, you can always come back, and we'll manage some way."

Helmi kissed her two good friends at the back door, but Rosie refused to go until she saw if the lady were at home.

"Maybe she's changed her mind," she said speaking from her experience with ladies—"or has got help—or somethin' has happened. You can't depend on these women in the West End. Ain't that right Dan? They don't pay their debts, either, very good. They always say 'Come back again.' Dan collected for a tailor, and he knows. They don't remember anything less than five dollars, and when they're stuck for another excuse they peep out of one of the windows to see who it is, and won't let you in."

Mrs. Herriott was in and had not engaged anyone else, and so the escort had to go home alone, which they did regretfully.

Helmi found the house in a state of siege. Confusion reigned everywhere. The invader slept in a baby carriage which filled the greater part of the living-room, and when he slept all noises were muffled. The grandmother, who had been conscripted into service, padded about in her bedroom slippers. The telephone bell was stuffed with paper. No one was admitted to the house, not even the baker.

The British custom of serving 4-o'clock tea in business offices is fast "taking on" in Canada. Many Canadian, as well as British-born, executives now order Red Rose Tea for their office staffs, because it is the same quality as the finest English teas. Sold by all grocers, in bright, clean aluminum.
1NEW

There was a little room off the kitchen where Helmi and Lili were to sleep. It had just room enough to take in the rubber-wheeled carriage.

"Oh, I will be so glad to have someone to take this old baby off my hands," said Mrs. Herriott frankly; "he spoiled last summer for me, but I don't mean to let him spoil this one. Isn't a baby awful? I hope yours is good. Anyway, I can get out now, and, believe me, I am going."

Mrs. Herriott, having shaken off family cares, resumed her place in her little world. She curled and played bridge, and went to the matinee with her friends and came home only when everything was over. She was a pretty, plump-faced girl of twenty-three who had the misfortune to be the only child of adoring parents. "Maudie is not fond of work," her mother often said; "but never mind, she'll take to it when she has a house of her own." Young Robert Herriott, who had married her with pomp and circumstance at the First Church believed the same thing.

Maudie had been in a terrible rage about the coming of the baby, but her mother fondly believed she would be attached to it when it came. "They make their own place, babies do," she said. "Maudie will be so fond of it she wouldn't take a million dollars for it when she has had it two days." But Maudie's friends agreed among themselves that they would hate to offer it to her.

The baby was now two months old, and the great fountain of mother love which the baby's grandmother had hoped for was still either non-existent or untouched. "She'll take to it when it gets a little older," she would say. "You'll see, when it gets cute Maudie will take to it."

Helmi knew that cats sometimes refuse their young, but she did not know that it could be true of human beings.

In a week the seige seemed to be lifted. Long lines of washing had been fluttering on the clothes reel; closets were tidied; floors polished, the "old" baby put on a regular way of living. Mrs. Herriott had won the Ladies' Points competition at the rink, and her friends had told her she was looking years younger.

One night, when the Herriotts were going for a drive, Mr. Herriott wanted to take Helmi, too, and her baby. "That girl hasn't been out of the house since she came," he said, "Ask her to come, Maudie."

Maudie laid a well manicured finger on a neatly carmined lip. "Hush, Bob," she said, "don't spoil her, leave well enough alone. Come on, we'll take the Bunnings—they have no kids to want to come. Hurry, Bob!"

(To Be Continued.)

The use of Miller's Worm Powders insures healthy children so far as the ailments attributable to worms are concerned. A high mortality among children is traceable to worms. These sap the strength of infants so that they are unable to maintain the battle for life and succumb to weakness. This preparation gives promise of health and keeps it.

May Abandon Geneva

Rumors Are Revived That League May Move To Another Capital

Rumors that the League of Nations may be transferred to some other European capital were renewed recently at Geneva when it was learned that the league had not succeeded in acquiring a site deemed necessary for the proposed league palace.

It appears that the English woman who is proprietor of the villa where league delegates have been housed for years is adamant in her refusal to sell the property. This has given a new impetus to those advocating taking the league out of Geneva and installing it in Vienna or elsewhere.

Canada Comes Second

According to word from New Zealand, that country claims a world leadership in per capita possession of dairy cows with 93.1 per hundred of population. Canada, according to the table, ranks second with 40.4 per hundred, followed by the Irish Free State with 40.0 per hundred. Australia has 39.9 cows per hundred of population.

Human nature's funny. No sooner does a man "get on his feet" financially than he wants to get off them physically.

A reliable antiseptic—Minard's.

Cancel Grants To Class "B" Fairs

As Federal Aid Withdrawn, Support Should Come From Provinces

Some discussion took place in the House at Ottawa, and criticism offered over the cancellation of federal grants, under the department, to class "B" fairs. Hon. W. R. Motherwell, minister of agriculture, explained that grants had been made to class "B" fairs during the war as a war measure. This aid had been discontinued, as they were not entitled to federal aid. They should get aid from the provinces. During the past few years, Mr. Motherwell said, he had noticed several provincial governments had increased their grants to class "B" fairs in anticipation of cancellation of aid by the federal government.

"Class "A" fairs were receiving federal aid, and while only $50,000 was granted as federal aid before the war, the amount now totalled $285,000 annually.

A large number of the members took part in the discussion, several of them expressing their opinion that the smaller fairs did as much, if not more, for agriculture generally than the big ones.

Alfred Speakman (U.F.A., Red Deer) believed in the encouragement of educational fairs, with good live-stock and agricultural exhibits, in place of those fairs specializing in side shows

M. McLean (Liberal, Melfort) spoke in favor of aid to the smaller fairs in the agricultural districts.

Another Reform In China

Ruler Of Honan Province Forbids Binding Of Women's Feet

Women of Honan are to totter no longer on tiny bound feet. Marshal Feng Yuhisiang, the revolutionary ruler of the province, has not only prohibited binding the feet of young girls, but also has ordered that the feet of their mothers and grandmothers must be loosed from their bonds.

This abolition of "lily feet," which Chinese for generations have considered among woman's greatest charms, but which appear as cruel deformities to most orientals, is to be accomplished by persuasioon if possible, but by direct official action if necessary. A propaganda against footbinding is being carried out in women's meetings, in newspapers and wall posters.

To enforce his edict Marshal Feng has established a "Bureau for the Liberation of the Feet of the Women," whose agents make house to house visits. Heads of households in which bound feet are found are to be punished. Agents are promised a bounty of $2.50 for every 100 sets of discarded foot wrappings they turn in, and one month of the campaign brought in more than 25,000 sets.

For Frost Bites and Chilblains.—Chilblains come from undue exposure to slush and cold and frost-bite from the icy winds of winter. In the treatment of either an excellent preparation is Dr. Thomas' Eclectric Oil, as it counteracts the inflammation and relieves the pain. The action of the oil is prompt and its application is extremely simple.

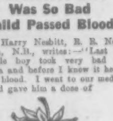
Late Threshing In Alberta

Estimates That Nearly Thirty Million Bushels Of Grain Threshed In Spring

Alberta's farmers, whose wheat was left in the field unthreshed all winter did not fare badly. In most cases, they made money through the fact that they could not sell their grain until this spring, since wheat, for example, increased in price from 20 to 23 cents a bushel. A local grain man estimated that nearly 30,000,000 bushels of grain were threshed in Alberta during the last part of the winter and this spring.

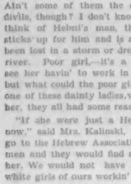
DIARRHŒA Was So Bad Child Passed Blood

Mrs. Harry Nesbitt, R. R. No. 2, Shannon, N.B., writes:—"Last Fall my little boy took very bad with diarrhœa and before I knew it he was passing blood. I went to our medicine case and gave him a dose of



and a little later gave him another, and half an hour after the second dose he got relief and by the time he had taken six doses he was like a different child."

This wonderful bowel complaint remedy has been on the market for over 80 years; put up only by The T. Milburn Co., Limited, Toronto, Ont.



Indigestion

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go learn—now—why this method is supreme.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

TOOTH STRAIGHTENING

Your child has "crooked teeth," and wisely, you are thinking of his future, and are not content to let this condition persist.

Irregular teeth are in a sense, a deformity, and often mar one's natural attractiveness, and indeed, in many instances may also lead to general systemic disturbances.

Now, can anytthing be done by way of correcting this mal-occlusion?

A great deal, especially if treatment is commenced while the child is still young.

Each case, of course, presents its own problems with their special solutions, but in the main, your dentist, or the orthodentist who specializes in this branch of dentistry, will correct this condition by making use of metal bands and bars which your child would need to wear continuously for some little time, the period of wearing being determined by the sevesity of the case in hand.

But you wonder, perhaps, how a tooth can be moved when fully erupted, encased as it is, in dense and seemingly unyielding bone.

However, it is simply a matter of making use of a natural physiological process whereby bone tissue is resorbed and broken down in advance of a properly applied and peristent force, thus permitting the tooth to move bodily throukh its supporting bony structure.

Then is tooth straigthening a painful process?

Not in the least, where too rapid movement is not attempted.

And when should it be commenced?

Many operators like to take the case in hand while the child still has the temporary set, and generally at about the eighth year, when success is more easily and quickly secured.

Then, of course, where treatment is delayed, the case becomes progressively more difficult of correction because the muscles and tissues are becoming more or less fixed. When early adult life is reached, "tooth straightening" is not advisable except in the very simple cases.

Alberta Telephones

An increase of 154 exchange stations and 93 rural stations, or a total of 247 new stations in operation during the month of April, 1928, is reported by the Alberta Department of Telephones.

Two French engineers have invented an aerial torpedo for transporting letters and packages at a speed of nearly 300 miles an hour.

"Do you think that Doris is fitted for the battle of life?"

"Well, she ought to be, she's been in four engagements already."

One of the commonest complaints of infants is worms, and the most effective application for them is Mother Graves' Worm Exterminator.

Carol: Does your husband gamble?

Jo: Not in an objectionable way. He nearly always wins.

Travelling at the rate of two miles a minute it would take an aeroplane nearly 35 years to reach Mars.

Minard's Liniment for insect bites.

Little Helps For This Week

"He that hath a pure heart shall receive the blessing from the Lord."
—Psalm xxiv. 4, 5.

O God! the pure alone,
  E'en in their deep confessing.
Can see Thee as their own,
  And find the perfect blessing;
Yet to each waiting soul
  Speak in Thy still, small voice,
Till broken love's made whole,
  And saddened hearts rejoice.

How does Jesus make men pure? He made Himself one with our human nature that He might heal and bless it through its contact with His divinity. He folded it around His eternal presence. He made it His own. He made it a power which could quicken and restore us; and then by the gift of His Spirit He bound us to it, He robed us in it; and henceforth Christian humanity became conscious of a Presence before which the unclean spirit cannot but shrink away.

—Cannon Liddon.

Afghanistan's Ameer is the first male sovereign to have made an undersea trip. Margherita of Italy was the first and only Queen to descend in a submarine; she did it off San Remo in 1922.

Cute in a Baby—Awful at Three—and it's Dangerous

by Ruth Brittain

Thumb sucking does look sweet in a baby, but it is disgusting in the three-year-old and sometimes it hangs on until fifteen or sixteen! The habit may cause an ill-formed mouth or induce adenoids; and it always interferes with digestion. Pinning the sleeve over the hand; attaching mittens, or putting on cardboard cuffs, which prevent bending the arms at the elbows, are some of the ways to stop the habit.

Another bad habit—irregularity in bowel action—is responsible for weak bowels and constipation in babies. Give the tiny bowels an opportunity to act at regular periods each day. If they don't act at first, a little Fletcher's Castoria will soon regulate them. Every mother should keep a bottle of it handy to use in case of colic, cholera, diarrhea, gas on stomach and bowels, constipation, loss of sleep, or when baby is cross and feverish. Its gentle influence over baby's system enables him to get full nourishment from his food, helps him gain, strengthens his bowels.

Castoria is purely vegetable and harmless—the recipe is on the wrapper. Physicians have prescribed it for over 30 years. With each package, you get a valuable book on Motherhood. Look for Chas. H. Fletcher's signature on the wrapper so you'll get the genuine.

Mr. and Mrs. F. O. McLean and family left this week for the Lethbridge district where Mr. McLean has purchased a farm.

* * *

The finishing touches are now being put on the work of tearing down the old Royal bank building. A gang of boys is now cleaning the bricks.

* * *

Hugh Watsn left last week for Calgary to consult a specialist abut his health. We are informed he has to undergo a serious opeation.

Radio Reception as you like it from a Westinghouse

[Compact Model - $82.50
Console Model - $167.00]

MUSIC—symphony orchestras—famous bands—world-renowned singers—always the full-toned rich productions—exactly as you would hear them in the studio.

One touch of the single dial control gives you the choice of the world's best music—"if it's in the air, a WESTINGHOUSE will get it."

You will be amazed at the perfect performance of the console model and its low cost of operation.
